

For Immediate Release

Hubbell Building Automation, Inc. announces the new Simplicity LX Occupancy Sensor

July 2005 - Austin, TX - Hubbell Building Automation, an industry leader in the development of cutting edge networked lighting control systems and occupancy sensing technologies announced today the introduction of the Simplicity LX Occupancy Sensor.

The Simplicity LX Occupancy Sensor is a LonMark® certified device that combines the superior ultrasonic (US) minor motion detection with excellent passive infrared (PIR) long range major motion detection to turn lighting systems on and off based on occupancy. The sensor complies with LonMark interoperability guidelines and is designed for use in open system, multi-vendor, interoperable LonWorks® networks.

The Simplicity LX Occupancy Sensor features Hubbell Building Automation's patented IntellADAPT™ technology which continuously analyzes the environment and self-adapts, eliminating manual sensitivity and timer adjustments during installation and over the life of the product, providing a truly maintenance free "Install and Forget" operation. Both FT-10 and LPT-10 versions are available.

About Hubbell Building Automation

Hubbell Building Automation, Inc., headquartered in Austin, TX is a subsidiary of Hubbell Incorporated (A Delaware Corporation). Hubbell Building Automation draws on over 30 years of lighting control experience. As the leading developer of groundbreaking technologies in networked lighting control systems, HID and Fluorescent controls as well as occupancy sensor controls, Hubbell Building Automation manufactures a complete suite of innovative, integrated and simple lighting control solutions.
