

For Immediate Release

Hubbell Building Automation, Inc. announces the new Simplicity LX Photo Sensor and Control Module

July 2005 - Austin, TX - Hubbell Building Automation, an industry leader in the development of cutting edge networked lighting control systems and occupancy sensing technologies announced today the introduction of the Simplicity LX Photo Sensor and Control Module.

The LonMark® certified Simplicity LX Photo Sensor and Control Module provides indoor, outdoor and skylight control of lighting circuits based on natural daylight. This network based photo sensor solution is capable of reporting current lighting levels in foot candles, setting up to 6 ON and OFF trip levels and generating network events based on these settings. The Control Module complies with LonMark interoperability guidelines and is designed for use in open system, multi-vendor, interoperable LonWorks® networks. Both FT-10 and LPT-10 versions are available.

About Hubbell Building Automation

Hubbell Building Automation, Inc., headquartered in Austin, TX is a subsidiary of Hubbell Incorporated (A Delaware Corporation). Hubbell Building Automation draws on over 30 years of lighting control experience. As the leading developer of groundbreaking technologies in networked lighting control systems, HID and Fluorescent controls as well as occupancy sensor controls, Hubbell Building Automation manufactures a complete suite of innovative, integrated and simple lighting control solutions.
